1981 Journal of Spacecraft and Rockets Index

Note: A Cumulative Index, referencing all of the papers published during 1980 and 1981 in the AIAA journals and the *Progress in Astronautics and Aeronautics* books, will be offered for sale early in 1982.

How to Use the Index

In the Subject Index, pages 568-570, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 571, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 572-575, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1981, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Remote Control Canard Missile with a Free-Rolling Tail Brake Torque System A81-094
Vortex Shedding as a Source of Acoustic Energy in Segmented Solid Rockets A81-055
Aerodynamics of a Turbojet-Boosted Launch Vehicle Concept A81-007

Aeroelasticity

Simulation and Modeling of Jet Plumes in Wind Tunnel Facilities A81-073

Configuration Design

Automated Technique for Developing Low-Drag Nose Shapes for Supersonic Missiles A81-001

Flight Displays

Numerical Study of Re-entry Vehicle Aerodynamics in Steady Coning Motion A81-039

Simulation

Simulation and Modeling of Jet Plumes in Wind Tunnel Facilities A81-073

Testing, Flight and Ground

Small-Scale Supersonic Inlet Test Facility A81-051

Energy

Photovoltaic Power

Plasma Collection by High-Voltage Spacecraft at Low Earth Orbit A81-013

Fluid Dynamics

Boundary Layers and Convective Heat Transfer-Laminar

Correlation of Artificially Induced Boundary-Layer Transition Data at Hypersonic Speeds A81-025
Approximate Convective-Heating Equations for Hypersonic Flows A81-011

Boundary Layers and Convective Heat Transfer-Turbulent

Approximate Convective-Heating Equations for Hypersonic Flows A81-011

Computational Methods

Design Approach for Estimating Body Slot Effects on Wing-Body-Tail Lift A81-083
Predicted Vortex Shedding from Noncircular Bodies in Supersonic Flow A81-067
Numerical Study of Re-entry Vehicle Aerodynamics in Steady Coning Motion A81-039
Primitive-Variable Model Applications to Solid-Fuel Ramjet Combustion A81-015

Hydrodynamics

Propellant Vortexing in a Spinning Spacecraft A81-072

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Jet Effects on Near Wake of an Axisymmetric Bluff Body A81-092
Simulation and Modeling of Jet Plumes in Wind Tunnel Facilities A81-073
Viscous Effects on Missile Aerodynamics at Low Angles of Attack A81-069
Predicted Vortex Shedding from Noncircular Bodies in Supersonic Flow A81-067
Effect of Aeroelastic Consideratons on Seasat-A Payload Shroud Design A81-041
Wind-Tunnel Measurements of Sabot-Discard Aerodynamics A81-040
Secondary Flows in a Rocket Launcher Tube A81-019
Steady and Unsteady Vortex-Induced Asymmetric Loads on Slender Vehicles A81-017
Simulation of Jet Plume Interference Effects During the Launch Phase of Missiles A81-005

Nonsteady Aerodynamics

Wave Dynamics of Unsteady Compressible Flow Networks A81-074
Viscous Effects on Missile Aerodynamics at Low Angles of Attack A81-069
Effect of Aeroelastic Consideratons on Seasat-A Payload Shroud Design A81-041
Wind-Tunnel Measurements of Sabot-Discard Aerodynamics A81-040
Effect of Mach Number on Slender Vehicle Dynamics A81-004

Nozzle and Channel Flow

Wave Dynamics of Unsteady Compressible Flow Networks A81-074
Prediction of Nozzle Side Forces Which Occur During Staging A81-070
Simulation of Jet Plume Interference Effects During the Launch Phase of Missiles A81-005

Plasmadynamics and MHD

Plasma Processes in Inert-Gas Thrusters A81-080
Measurement of the Charge-Exchange Plasma Flow from an Ion Thruster A81-078
Electromagnetic Propulsion Without Ionization A81-077

Rarefied Flows

Measurement of the Charge-Exchange Plasma Flow from an Ion Thruster A81-078
Procedure for Obtaining Aerodynamic Properties of Spacecraft A81-064
Spacecraft Outgas Ambient Flow Interaction A81-006

Shock Waves and Detonations

Gas Gun Study of Polyethylene Buffers for Spall Fracture Reduction in Missile Materials A81-096

Subsonic Flow

Jet Effects on Near Wake of an Axisymmetric Bluff Body A81-092

Supersonic and Hypersonic Flow

Wind-Tunnel Measurements of Sabot-Discard Aerodynamics A81-040
Numerical Study of Re-entry Vehicle Aerodynamics in Steady Coning Motion A81-039
Correlation of Artificially Induced Boundary-Layer Transition Data at Hypersonic Speeds A81-025

Viscous Nonboundary-Layer Flows

Jet Effects on Near Wake of an Axisymmetric Bluff Body A81-092
Void Characteristics of a Liquid-Filled Cylinder Undergoing Spinning and Coning Motion A81-049

Wave Motion and Sloshing

Wave Dynamics of Unsteady Compressible Flow Networks A81-074

Interdisciplinary Topics

Analytical and Numerical Methods

Ball-Obturation of a Spinning Tubular Projectile A81-091
Tracking Gain Expression of a Strong Signal-to-Noise Monopulse Radar A81-076
Matrix Difference Equation Analysis of Vibrating Circumferentially Periodic Structures A81-016
Closed-Form Solution for Ballistic Vehicle Motion A81-009

Atmospheric and Space Sciences

Gust Model Based on the Bivariate Gamma Probability Distribution A81-093
Modification of Spacecraft Potentials by Plasma Emission A81-079
Fate of Argon-Ion Injection in the Magnetosphere A81-043
Changes in Electromagnetic Properties of the Upper Atmosphere due to Rocket Effluents A81-042
TIROS-N-- Operational Environmental Satellite of the 80's A81-028
Orbital Analysis for the Upper-Atmosphere Research Satellite Missions A81-022

Computer Communications, Information Processing and Software

Information Adaptive System: An Investigation of Onboard Data Processing A81-082

Computer Science

Time Delay Computer for Precise Control in Recording Transient Events A81-052

Computer Technology

Time Delay Computer for Precise Control in Recording Transient Events A81-052

Law, History, Policy, and Sociology

Sources of Orbital Debris and the Projected Environment for Future Spacecraft A81-062
Origin of the Electron-Bombardment Ion Thruster (History of Key Technologies) A81-050

Reliability, Maintainability, and Logistics Support

Fault-Tolerant Communications Processor A81-066

Sources of Orbital Debris and the Projected Environment for Future Spacecraft A81-062

Satellite Communication Systems (including Terrestrial Stations)

Past and Present INTELSAT TWTA Life Performance A81-085
Fault-Tolerant Communications Processor A81-066
Prefiltered Quadrature Phase-Shift Keying: A Bandwidth- and Power-Efficient Modulation A81-047
Scanning-Spot-Beam Satellite for Domestic Service A81-046
30/20-GHz Band Earth Stations A81-045
Present and Future Aspects of Japanese CS Program A81-044
Landsat D Telecommunications Payload: Earth Imaging Data via TDRS A81-029
Demand-Assigned TDMA System for a Digitally Integrated Services Network A81-021
Satellite Communication Technology - Challenges for the 1980's A81-018
K_a-Band, Multibeam, Contiguous-Coverage Satellite Antennas for the U.S. A81-008

Sensor Systems

Tracking Gain Expression of a Strong Signal-to-Noise Monopulse Radar A81-076
Satellites for the Detection of Nonsolar Planets A81-027
Orbital Analysis for the Upper-Atmosphere Research Satellite Missions A81-022

Space Processing

Information Adaptive System: An Investigation of Onboard Data Processing A81-082
Fault-Tolerant Communications Processor A81-066
Operational Factors Affecting Microgravity Levels in Orbit A81-023

State Estimation

Tracking Gain Expression of a Strong Signal-to-Noise Monopulse Radar A81-076

Launch Vehicle and Missile (LV/M) Technology

Aerodynamic Heating and Ablation

Effect of Aeroelastic Consideratons on Seasat-A Payload Shroud Design A81-041

Aerodynamics

Design Approach for Estimating Body Slot Effects on Wing-Body-Tail Lift A81-083
Lateral Forces on a Slender Body and Their Alleviation at High Incidence A81-068
Aerodynamic Design Criteria for Supersonic Climb-Cruise Missiles A81-024
Steady and Unsteady Vortex-Induced Asymmetric Loads on Slender Vehicles A81-017
Aerodynamics of a Turbojet-Boosted Launch Vehicle Concept A81-007
Effect of Mach Number on Slender Vehicle Dynamics A81-004
Automated Technique for Developing Low-Drag Nose Shapes for Supersonic Missiles A81-001

Configurational Design

Aerodynamic Design Criteria for Supersonic Climb-Cruise Missiles A81-024

Dynamics and Control

Ball-Obturation of a Spinning Tubular Projectile A81-091
Lateral Forces on a Slender Body and Their Alleviation at High Incidence A81-068

Launch Vehicle Systems

Feasibility of Recovering a One-Million-Pound Booster (Deceleration System) A81-038
Secondary Flows in a Rocket Launcher Tube A81-019
Aerodynamics of a Turbojet-Boosted Launch Vehicle Concept A81-007

Missile Systems

Gas Gun Study of Polyethylene Buffers for Spall Fracture Reduction in Missile Materials A81-096
Remote Control Canard Missile with a Free-Rolling Tail Brake Torque System A81-094
Nozzleless Boosters for Integral-Rocket-Ramjet Missile Systems A81-033

Mission Studies and Economics

Automated Technique for Developing Low-Drag Nose Shapes for Supersonic Missiles A81-001

Propulsion and Propellant Systems

Ball-Obturation of a Spinning Tubular Projectile A81-091
Electromagnetic Propulsion Without Ionization A81-077
Characterization of Particulates in the Exhaust Plume of Large Solid-Propellant Rockets A81-053
Automated Approach to Design of Solid Rockets A81-034

Simulation

Gust Model Based on the Bivariate Gamma Probability Distribution A81-093
Simulation of Jet Plume Interference Effects During the Launch Phase of Missiles A81-005

Structural Design (including Loads)

Gust Model Based on the Bivariate Gamma Probability Distribution A81-093
Bond Stress Transducer Design for Solid Propellant Rocket Motors A81-071
Recovered Transient Load Analysis for Payload Structural Systems A81-065
Design, Analysis, and Tests of a Shuttle-Type Heat-Pipe-Cooled Leading Edge A81-012

Subsystem Design and Ground Support

Feasibility of Recovering a One-Million-Pound Booster (Deceleration System) A81-038

Testing, Flight and Ground

Secondary Flows in a Rocket Launcher Tube A81-019

Trajectories and Tracking Systems

Void Characteristics of a Liquid-Filled Cylinder Undergoing Spinning and Coning Motion A81-049

Propulsion

Airbreathing Propulsion

Critical Considerations in the Design of Supersonic Combustion Ramjet (Scramjet) Engines A81-061
Light Transmission Measurements in Solid Fuel Ramjet Combustors A81-020
Primitive-Variable Model Applications to Solid-Fuel Ramjet Combustion A81-015

Combustion and Combustor Designs

Cooling of High-Pressure Rocket Thrust Chambers with Liquid Oxygen A81-059
Technology Status of Liquid Fluorine-Hydrazine Rocket Engine A81-032
Light Transmission Measurements in Solid Fuel Ramjet Combustors A81-020
Primitive-Variable Model Applications to Solid-Fuel Ramjet Combustion A81-015

Combustion Stability, Ignition, and Detonation

Vortex Shedding as a Source of Acoustic Energy in Segmented Solid Rockets A81-055

Electric and Advanced Space Propulsion

Modification of Spacecraft Potentials by Thermal Electron Emission on ATS-5 A81-090
Plasma Processes in Inert-Gas Thrusters A81-080
Modification of Spacecraft Potentials by Plasma Emission A81-079
Electromagnetic Propulsion Without Ionization A81-077
Origin of the Electron-Bombardment Ion Thruster (History of Key Technologies) A81-050
Fate of Argon-Ion Injection in the Magnetosphere A81-043

Engine Performance

Aluminum Oxide Particle Size for Solid Rocket Motor Performance Prediction A81-084
Effect of Duty Cycle on Catalytic Thruster Degradation A81-037
Nozzleless Boosters for Integral-Rocket-Ramjet Missile Systems A81-033
Technology Status of Liquid Fluorine-Hydrazine Rocket Engine A81-032

Environmental Effects

Fate of Argon-Ion Injection in the Magnetosphere A81-043
Changes in Electromagnetic Properties of the Upper Atmosphere due to Rocket Effluents A81-042

Fuels and Propellants, Properties of

Experiments of Surface Tension Separator for Propellant Feed System A81-056
Characterization of Particulates in the Exhaust Plume of Large Solid-Propellant Rockets A81-053
HTPB Propellant Aging A81-036

Liquid Rocket Engines and Missile Systems

Propellant Vortexing in a Spinning Spacecraft A81-072
Cooling of High-Pressure Rocket Thrust Chambers with Liquid Oxygen A81-059
Long-Life Bipropellant System Demonstration, Viking Orbiter Propulsion System A81-057
Contamination Effect of MMH/N_2O_4 Rocket Plume Product Deposit A81-054
Effect of Duty Cycle on Catalytic Thruster Degradation A81-037

Solid and Hybrid Rocket Engines

Aluminum Oxide Particle Size for Solid Rocket Motor Performance Prediction A81-084
Bond Stress Transducer Design for Solid Propellant Rocket Motors A81-071
Propellant Failure: A Fracture-Mechanics Approach A81-058
Vortex Shedding as a Source of Acoustic Energy in Segmented Solid Rockets A81-055
Automated Approach to Design of Solid Rockets A81-034
Nozzleless Boosters for Integral-Rocket-Ramjet Missile Systems A81-033

Spacecraft Technology

Configurational and Structural Design (including Loads)

Structural Sizing Considerations for Large Space Platforms A81-095
Entry and Landing Probe for Titan A81-026
Operational Factors Affecting Microgravity Levels in Orbit A81-023

Data Sensing, Presentation, and Transmission

TIROS-N-- Operational Environmental Satellite of the 80's A81-028

Dynamics and Control

Procedure for Obtaining Aerodynamic Properties of Spacecraft A81-064
Operational Factors Affecting Microgravity Levels in Orbit A81-023
Electronic Damping of Orthogonal Bending Modes in a Cylindrical Mast - Experiment A81-003
Electronic Damping of Orthogonal Bending Modes in a Cylindrical Mast - Theory A81-002

Earth-Orbital Trajectories

Probability of Collisions in the Geostationary Ring A81-063
Orbital Analysis for the Upper-Atmosphere Research Satellite Missions A81-022
Orbit Determination and Prediction Methods for Satellite-Aided Search and Rescue A81-010

Electric Power

Modification of Spacecraft Potentials by Thermal Electron Emission on ATS-5 A81-090
Modification of Spacecraft Potentials by Plasma Emission A81-079
Plasma Collection by High-Voltage Spacecraft at Low Earth Orbit A81-013

Entry Vehicle Mission Studies and Flight Mechanics

Entry and Landing Probe for Titan A81-026
Closed-Form Solution for Ballistic Vehicle Motion A81-009

Entry Vehicles and Landers

Entry and Landing Probe for Titan A81-026

Meteoroid and Radiation Protection

Magnetospheric Radiation Environment in a 12-Hour Circular Orbit A81-081
Sources of Orbital Debris and the Projected Environment for Future Spacecraft A81-062
Outer Zone Energetic Electron Spectral Measurements A81-014

Mission Analysis

Selection of an Optimized Integrated Propulsion System A81-086

Propulsion Systems Integration

Selection of an Optimized Integrated Propulsion System A81-086
Propellant Vortexing in a Spinning Spacecraft A81-072
Propulsion Subsystem for the Multimission Modular Spacecraft (MMS) A81-060
Long-Life Bipropellant System Demonstration, Viking Orbiter Propulsion System A81-057

Signatures and Tracking

Orbit Determination and Prediction Methods for Satellite-Aided Search and Rescue A81-010

Simulation

Laboratory Study of the Charging of Spacecraft Materials A81-088
Charging Results from the Surface Potential Monitor A81-087

Sterilization

Spacecraft Outgas Ambient Flow Interaction A81-006

Systems

Modification of Spacecraft Potentials by Thermal Electron Emission on ATS-5 A81-090
Selection of an Optimized Integrated Propulsion System A81-086
Propulsion Subsystem for the Multimission Modular Spacecraft (MMS) A81-060
Electrostatic Potential of an Equatorial Satellite A81-030
TIROS-N-- Operational Environmental Satellite of the 80's A81-028

Temperature Control

Contamination Effect of MMH/N_2O_4 Rocket Plume Product Deposit A81-054

Testing, Flight and Ground

Laboratory Study of the Charging of Spacecraft Materials A81-088
Charging Results from the Surface Potential Monitor A81-087
Computerized Process for Calculation of Discrete Test Loads A81-031

Structural Mechanics and Materials

Materials, Properties of

Gas Gun Study of Polyethylene Buffers for Spall Fracture Reduction in Missile Materials A81-096
Laboratory Study of the Charging of Spacecraft Materials A81-088
Propellant Failure: A Fracture-Mechanics Approach A81-058
Simple Rate-Independent Model for Damage A81-048

Structural Design

Structural Sizing Considerations for Large Space Platforms A81-095

Structural Durability (including Fatigue and Fracture)

Structural Analysis and Testing of the Space Shuttle Orbiter Window System A81-075
Propellant Failure: A Fracture-Mechanics Approach A81-058

Structural Dynamics

Recovered Transient Load Analysis for Payload Structural Systems A81-065
Matrix Difference Equation Analysis of Vibrating Circumferentially Periodic Structures A81-016
Electronic Damping of Orthogonal Bending Modes in a Cylindrical Mast - Experiment A81-003
Electronic Damping of Orthogonal Bending Modes in a Cylindrical Mast - Theory A81-002

Structural Statics

Structural Analysis and Testing of the Space Shuttle Orbiter Window System A81-075
Computerized Process for Calculation of Discrete Test Loads A81-031

Thermal Stresses

Structural Analysis and Testing of the Space Shuttle Orbiter Window System A81-075
Nonlinear Viscoelastic Design of Case-Bonded CMDB Grains A81-035

Thermophysics and Thermochemistry

Heat Pipes

Design, Analysis, and Tests of a Shuttle-Type Heat-Pipe-Cooled Leading Edge A81-012

Radiation and Radiative Heat Transfer

Design and Off-Design Performance Calculation of Space Radiators A81-089

Thermal Control

Design and Off-Design Performance Calculation of Space Radiators A81-089
Design, Analysis, and Tests of a Shuttle-Type Heat-Pipe-Cooled Leading Edge A81-012

Thermal Surface Properties

Contamination Effect of MMH/N_2O_4 Rocket Plume Product Deposit A81-054

Chronological Index

A81-001 Automated Technique for Developing Low-Drag Nose Shapes for Supersonic Missiles. Robert J. Krieger, *McDonnell Douglas Astronautics Company* (JSR **18**, 1, p. 3) Synoptic based on AIAA Paper 80-0361

A81-002 Electronic Damping of Orthogonal Bending Modes in a Cylindrical Mast - Theory. Charles J. Swigert, *Hughes Aircraft Company*; and Robert L. Forward, *Hughes Research Laboratories* (JSR **18**, 1, p. 5) Article

A81-003 Electronic Damping of Orthogonal Bending Modes in a Cylindrical Mast - Experiment. Robert L. Forward, *Hughes Research Laboratories* (JSR **18**, 1, p. 11) Article

A81-004 Effect of Mach Number on Slender Vehicle Dynamics. Lars E. Ericsson, *Lockheed Missiles & Space Company, Inc.* (JSR **18**, 1, p. 18) Article based on AIAA Paper 80-0362

A81-005 Simulation of Jet Plume Interference Effects During the Launch Phase of Missiles. H. H. Korst, T. L. Butler and M. B. Briski, *University of Illinois at Urbana-Champaign* (JSR **18**, 1, p. 24) Article based on AIAA Paper 79-1292

A81-006 Spacecraft Outgas Ambient Flow Interaction. G. A. Bird, *University of Sydney* (JSR **18**, 1, p. 31) Article

A81-007 Aerodynamics of a Turbojet-Boosted Launch Vehicle Concept. W. J. Small and G. D. Riebe, *NASA Langley Research Center*; and A. H. Taylor, *Kentron International* (JSR **18**, 1, p. 36) Article based on AIAA Paper 80-0360

A81-008 K_a-Band, Multibeam, Contiguous-Coverage Satellite Antennas for the U.S. Peter Foldes, *General Electric Company* (JSR **18**, 1, p. 44) Article based on AIAA Paper 80-0557 CP802

A81-009 Closed-Form Solution for Ballistic Vehicle Motion. Frank J. Barbera, *Kaman Sciences Corporation* (JSR **18**, 1, p. 52) Article based on AIAA Paper 79-1672 CP7911

A81-010 Orbit Determination and Prediction Methods for Satellite-Aided Search and Rescue. W. B. Graham and F. R. Vigneron, *Communications Research Centre* (JSR **18**, 1, p. 58) Article based on AIAA Paper 80-0240

A81-011 Approximate Convective-Heating Equations for Hypersonic Flows. E. V. Zoby, J. N. Moss and K. Sutton, *NASA Langley Research Center* (JSR **18**, 1, p. 64) Article based on AIAA Paper 79-1078

A81-012 Design, Analysis, and Tests of a Shuttle-Type Heat-Pipe-Cooled Leading Edge. Charles J. Camarda, *NASA Langley Research Center*; and Robert V. Masek, *McDonnell Douglas Astronautics Company East* (JSR **18**, 1, p. 71) Article

A81-013 Plasma Collection by High-Voltage Spacecraft at Low Earth Orbit. I. Katz, M. J. Mandell, G. W. Schnuelle, D. E. Parks and P. G. Steen, *Systems, Science and Software* (JSR **18**, 1, p. 79) Article based on AIAA Paper 80-0042

A81-014 Outer Zone Energetic Electron Spectral Measurements. J. B. Reagan, R. W. Nightingale, E. E. Gaines and W. L. Imhof, *Lockheed Palo Alto Research Labortory*; and E. G. Stassinopoulos, *National Space Science Data Center* (JSR **18**, 1, p. 83) Article based on AIAA Paper 80-0390

A81-015 Primitive-Variable Model Applications to Solid-Fuel Ramjet Combustion. Charles A. Stevenson and David W. Netzer, *Naval Postgraduate School* (JSR **18**, 1, p. 89) Article

A81-016 Matrix Difference Equation Analysis of Vibrating Circumferentially Periodic Structures, P.H. Denke and G.R. Eide, *Douglas Aircraft Company, McDonnell Douglas Corporation* (JSR **18**, 1, p. 95) Engineering Note

A81-017 Steady and Unsteady Vortex-Induced Asymmetric Loads on Slender Vehicles. L. E. Ericsson and J.P. Reding, *Lockheed Missiles and Space Company, Inc.* (JSR **18**, 2, p. 97) Survey Paper based on AIAA Paper 80-0181

A81-018 Satellite Communication Technology - Challenges for the 1980's. D. K. Sachdev, *INTELSAT, Washington, D. C.* (JSR **18**, 2, p. 110) Survey Paper based on AIAA Paper 80-0548 CP802

A81-019 Secondary Flows in a Rocket Launcher Tube. John J. Bertin, *The University of Texas at Austin*; Edward S. Idar III, *Los Alamos Scientific Laboratory*; and David L. Booker, *Redstone Arsenal* (JSR **18**, 2, p. 119) Article based on AIAA Paper 80-0372

A81-020 Light Transmission Measurements in Solid Fuel Ramjet Combustors. Michael E. Hewett and David W. Netzer, *Naval Postgraduate School* (JSR **18**, 2, p. 127) Article

A81-021 Demand-Assigned TDMA System for a Digitally Integrated Services Network. Yoshio Watanabe, Shuichi Samejima, Shuzo Kato and Kenji Kohiyama, *Yokosuka Electrical Communication Laboratory, NTT* (JSR **18**, 2, p. 133) Article based on AIAA Paper 80-0489 CP802

A81-022 Orbital Analysis for the Upper-Atmosphere Research Satellite Missions. Edwin F. Harrison, *NASA Langley Research Center*; and Gary G. Gibson, *Kentron International, Inc.* (JSR **18**, 2, p. 138) Article based on AIAA Paper 80-0236

A81-023 Operational Factors Affecting Microgravity Levels in Orbit. R. E. Olsen and J. Mockovciak Jr., *Grumman Aerospace Corporation* (JSR **18**, 2, p. 141) Article based on AIAA Paper 80-0317

A81-024 Aerodynamic Design Criteria for Supersonic Climb-Cruise Missiles. Robert J. Krieger, *McDonnell Douglas Astronautics Company* (JSR **18**, 2, p. 145) Article based on AIAA Paper 79-1671 CP7911

A81-025 Correlation of Artificially Induced Boundary-Layer Transition Data at Hypersonic Speeds. A. H. Boudreau, *Sverdrup/ARO, Inc.* (JSR **18**, 2, p. 152) Article

A81-026 Entry and Landing Probe for Titan. J. P. Murphy and J. N. Cuzzi, *NASA Ames Research Center*; A. J. Butts and P. C. Carroll, *Martin Marietta Aerospace Company* (JSR **18**, 2, p. 157) Article based on AIAA Paper 80-0117

A81-027 Satellites for the Detection of Nonsolar Planets. Lothar W. Bandermann and Richard H. Pohle, *Lockheed Palo Alto Research Laboratories*; James P. Murphy, John W. Vorreiter and David C. Black, *NASA Ames Research Center* (JSR **18**, 2, p. 164) Article based on AIAA Paper 79-0949 CP797

A81-028 TIROS-N-- Operational Environmental Satellite of the 80's. A. Schnapf, *RCA Astro-Electronics* (JSR **18**, 2, p. 172) Article based on AIAA Paper 80-0529 CP802

A81-029 Landsat D Telecommunications Payload: Earth Imaging Data via TDRS. H, B. Poza, *TRW Defense and Space Systems Group* (JSR **18**, 2, p. 178) Article based on AIAA Paper 80-0528 CP802

A81-030 Electrostatic Potential of an Equatorial Satellite. Nellore S. Venkataraman, *Instituto de Pesquisas Espaciais Conselho Nacional de Desenvolvimento Cientifico e Tecnologico CNPq* (JSR **18**, 2, p. 186) Engineering Note

A81-031 Computerized Process for Calculation of Discrete Test Loads. H.A. Tutty and R. S. Lahey, *Lockheed California Company* (JSR **18**, 2, p. 188) Engineering Note based on AIAA Paper 80-0808 CP804

A81-032 Technology Status of Liquid Fluorine-Hydrazine Rocket Engine. Marshall A. Appel and Gerhard W. Kruger, *California Institute of Technology* (JSR **18**, 2, p. 190) Engineering Note based on AIAA Paper 80-1171

A81-033 Nozzleless Boosters for Integral-Rocket-Ramjet Missile Systems. I. M. Procinsky and Catherine A. McHale, *Atlantic Research Corporation* (JSR **18**, 3, p. 193) Article based on AIAA Paper 80-1277

A81-034 Automated Approach to Design of Solid Rockets. Richard H. Sforzini, *Auburn University* (JSR **18**, 3, p. 200) Article based on AIAA Paper 80-1135

A81-035 Nonlinear Viscoelastic Design of Case-Bonded CMDB Grains. G. Meili, G. Dubroca, M. Pasquier and J. Thepenier, *Societe Nationale des Poudres et Explosifs* (JSR **18**, 3, p. 206) Article

A81-036 HTPB Propellant Aging. A. G. Christiansen, L. H. Layton and R. L. Carpenter, *Thiokol Corporation* (JSR **18**, 3, p. 211) Article

A81-037 Effect of Duty Cycle on Catalytic Thruster Degradation. H. C. Hearn, *Lockheed Missiles and Space Company* (JSR **18**, 3, p. 216) Article

A81-038 Feasibility of Recovering a One-Million-Pound Booster (Deceleration System). Royce A. Toni, *Irvin Industries Canada Limited*; and Clinton V. Eckstrom, *NASA Langley Research Center* (JSR **18**, 3, p. 222) Article

A81-039 Numerical Study of Re-entry Vehicle Aerodynamics in Steady Coning Motion. T. C. Lin, *TRW Defense and Space Systems Group* (JSR **18**, 3, p. 228) Article

A81-040 Wind-Tunnel Measurements of Sabot-Discard Aerodynamics. Edward M. Schmidt, *U. S. Army Ballistics Research Laboratory* (JSR **18**, 3, p. 235) Article

A81-041 Effect of Aeroelastic Consideratons on Seasat-A Payload Shroud Design. Peter J. Reding and Lars E. Ericsson, *Lockheed Missiles and Space Company, Inc.* (JSR **18**, 3, p. 241) Article

A81-042 Changes in Electromagnetic Properties of the Upper Atmosphere due to Rocket Effluents. Paul A. Bernhardt, *Stanford University* (JSR **18**, 3, p. 248) Article

A81-043 Fate of Argon-Ion Injection in the Magnetosphere. Y. T. Chiu, *The Aerospace Corporation* (JSR **18**, 3, p. 254) Article

A81-044 Present and Future Aspects of Japanese CS Program. Ken-ichi Tsukamoto, *Radio Research Laboratories*; Hiroaki Fuketa, *Yokosuka Electrical Communication Laboratory, NTT*; and Yoh Ichikawa, *National Space Development Agency of Japan* (JSR **18**, 3, p. 259) Article

A81-045 30/20-GHz Band Earth Stations. Hiroaki Fuketa, Minoru Kuramoto, Takeo Inoue and Haruhiko Kato, *Nippon Telegraph and Telephone Public Corporation* (JSR **18**, 3, p. 268) Article

A81-046 Scanning-Spot-Beam Satellite for Domestic Service. Y. S. Yeh, *Bell Laboratories* (JSR **18**, 3, p. 274) Article

A81-047 Prefiltered Quadrature Phase-Shift Keying: A Bandwidth- and Power-Efficient Modulation. M. U. Chang, *Hughes Aircraft Company*; and M.C. Austin, *Sperry Univac* (*JSR* **18**, 3, 279) Article

A81-048 Simple Rate-Independent Model for Damage. Morton E. Gurtin, *Carnegie-Mellon University*; and Eugene C. Francis, *United Technologies Corporation* (JSR **18**, 3, p. 285) Engineering Note based on AIAA Paper 80-1176

A81-049 Void Characteristics of a Liquid-Filled Cylinder Undergoing Spinning and Coning Motions. Miles C. Miller, *ARRADCOM* (JSR **18**, 3, p. 286) Engineering Note

A81-050 Origin of the Electron-Bombardment Ion Thruster (History of Key Technologies). Harold R. Kaufman, *Colorado State University* (JSR **18**, 4, p. 289) Article

A81-051 Small-Scale Supersonic Inlet Test Facility. M. Haas and A. J. Karanian, *United Technologies Research Center* (JSR **18**, 4, p. 293) Synoptic based on AIAA Paper 80-1145

A81-052 Time Delay Computer for Precise Control in Recording Transient Events. Paul A. Weber, *U. S. Air Force, Wright Patterson AFB*; and William C. Elrod, *Air Force Institute of Technology, AFIT/ENY, Wright-Patterson AFB* (JSR **18**, 4, p. 295) Synoptic based on AIAA Paper 80-1143

A81-053 Characterization of Particulates in the Exhaust Plume of Large Solid-Propellant Rockets. Leon D. Strand, James M. Bowyer, Guilio Varsi, Eric G. Laue and Robert Gauldin, *Jet Propulsion Laboratory, California Institute of Technology* (JSR **18**, 4, p. 297) Article based on AIAA Paper 80-0354

A81-054 Contamination Effect of MMH/N_2O_4 Rocket Plume Product Deposit. Chang-Keng Liu and A.P.M. Glassford, *Lockheed Palo Alto Research Laboratories* (JSR **18**, 4, p. 306) Article

A81-055 Vortex Shedding as a Source of Acoustic Energy in Segmented Solid Rockets. R. S. Brown, R. Dunlap, S. W. Young and R. C. Waugh, *United Technologies* (JSR **18**, 4, p. 312) Article based on AIAA Paper 80-1092

A81-056 Experiments of Surface Tension Separator for Propellant Feed System. S. Enya, T. Kisaragi, J. Ochiai and Y. Sasao, *Ishikawajima-Harima Heavy Industries Company, Ltd.*; and K. Kuriki, *Institute of Space and Aeronautical Science, University of Tokyo* (JSR **18**, 4, p. 320) Article based on AIAA Paper 80-1097

A81-057 Long-Life Bipropellant System Demonstration, Viking Orbiter Propulsion System, D.D. Schmit, J. W. Anderson and F. C. Vote, *Jet Propulsion Laboratory* (JSR **18**, 4, p. 327) Article based on AIAA Paper 80-1173

A81-058 Propellant Failure: A Fracture-Mechanics Approach. A. J. Kinloch and R. A. Gledhill, *Ministry of Defence (United Kingdom)* (JSR **18**, 4, p. 333) Article based on AIAA Paper 80-1180

A81-059 Cooling of High-Pressure Rocket Thrust Chambers with Liquid Oxygen. H. G. Price, *NASA Lewis Research Center* (JSR **18**, 4, p. 338) Article based on AIAA Paper 80-1260

A81-060 Propulsion Subsystem for the Multimission Modular Spacecraft (MMS). R. Finston and L. M. Spicer, *Hughes Aircraft Company, Space and Communications Group* (JSR **18**, 4, p. 344) Article based on AIAA Paper 80-1291

A81-061 Critical Considerations in the Design of Supersonic Combustion Ramjet (Scramjet) Engines. P. J. Waltrup, F. S. Billig and M. C. Evans, *The Johns Hopkins University Applied Physics Laboratory* (JSR **18**, 4, p. 350) Article based on AIAA Paper 80-1284

A81-062 Sources of Orbital Debris and the Projected Environment for Future Spacecraft. D. J. Kessler, *NASA Johnson Space Center* (JSR **18**, 4, p. 357) Article based on AIAA Paper 80-0855

A81-063 Probability of Collisions in the Geostationary Ring. Martin Hechler and Jozef C. Van der Ha, *European Space Operations Centre, ESA (Federal Republic of Germany)* (JSR **18**, 4, p. 361) Article

A81-064 Procedure for Obtaining Aerodynamic Properties of Spacecraft. Richard M. Fredo and Marshall H. Kaplan, *The Pennsylvania State University* (JSR **18**, 4, p. 367) Article

A81-065 Recovered Transient Load Analysis for Payload Structural Systems. J. C. Chen, K. P. Zagzebski and J. A. Garba, *Jet Propulsion Laboratory, California Institute of Technology* (JSR **18**, 4, p. 374) Article based on AIAA Paper 80-0803 CP804

A81-066 Fault-Tolerant Communications Processor. J. J. Stiffler, *Raytheon Company* (JSR **18**, 4, p. 380) Article based on AIAA Paper 79-1948 CP7913

A81-067 Predicted Vortex Shedding from Noncircular Bodies in Supersonic Flow. Michael R. Mendenhall, *Nielsen Engineering & Research, Inc.* (JSR **18**, 5, p. 385) Article based on AIAA Paper 80-1559 CP806

A81-068 Lateral Forces on a Slender Body and Their Alleviation at High Incidence. D. Almosnino and J. Rom, *Technion-Israel Institute of Technology* (JSR **18**, 5, p. 393) Article based on AIAA Paper 80-1558 CP806

A81-069 Viscous Effects on Missile Aerodynamics at Low Angles of Attack. Lars E. Ericsson, *Lockheed Missiles & Space Company, Inc.* (JSR **18**, 5, p. 401) Article based on AIAA Paper 80-1378

A81-070 Prediction of Nozzle Side Forces Which Occur During Staging. J. A. Sadunas and E. P French, *Rockwell International*; and W. L. Daines, *Hercules, Inc.* (JSR **18**, 5, p. 406) Article based on AIAA Paper 80-1219

A81-071 Bond Stress Transducer Design for Solid Propellant Rocket Motors. E. C. Francis and R. E. Thompson, *United Technologies Corporation* (JSR **18**, 5, p. 411) Article based on AIAA Paper 80-1278

A81-072 Propellant Vortexing in a Spinning Spacecraft. G. F. Pasley, *Hughes Aircraft Company* (JSR **18**, 5, p. 418) Article

A81-073 Simulation and Modeling of Jet Plumes in Wind Tunnel Facilities. H. H. Korst and R. A. White, *University of Illinois at Urbana-Champaign*; S. E. Nyberg and J. Agrell, *The Aeronautical Research Institute of Sweden* (JSR **18**, 5, p. 427) Article based on AIAA Paper 80-0430 CP801

A81-074 Wave Dynamics of Unsteady Compressible Flow Networks. V. E. Haloulakos, *McDonnell Douglas Astronautics Company* (JSR **18**, 5, p. 435) Article based on AIAA Paper 80-1447

A81-075 Structural Analysis and Testing of the Space Shuttle Orbiter Window System. H. Dote and K. T. Theodore, *Rockwell International Space Systems Group* (JSR **18**, 5, p. 440) Article based on AIAA Paper 80-0810 CP804

A81-076 Tracking Gain Expression of a Strong Signal-to-Noise Monopulse Radar. A. P. Wang, *Arizona State University* (JSR **18**, 5, p. 446) Article

A81-077 Electromagnetic Propulsion Without Ionization. James E. Cox, *Consultant* (JSR **18**, 5, p. 449) Article based on AIAA Paper 80-1235

A81-078 Measurement of the Charge-Exchange Plasma Flow from an Ion Thruster. M. R. Carruth Jr., *Jet Propulsion Laboratory, California Institute of Technology*; and M. E. Brady, *Boeing Aerospace Company* (JSR **18**, 5, p. 457) Article based on AIAA Paper 80-1388

A81-079 Modification of Spacecraft Potentials by Plasma Emission. Richard Christopher Olsen, *The University of Alabama in Huntsville* (JSR **18**, 5, p. 462) Article

A81-080 Plasma Processes in Inert-Gas Thrusters. Harold R. Kaufman and Raymond S. Robinson, *Colorado State University* (JSR **18**, 5, p. 470) Article based on AIAA Paper 79-2055 CP7912

A81-081 Magnetospheric Radiation Environment in a 12-Hour Circular Orbit. J. B. Blake, *The Aerospace Corporation* (JSR **18**, 5, p. 477) Article

A81-082 Information Adaptive System: An Investigation of Onboard Data Processing. Barry D. Meredith, W. Lane Kelly and Roger A. Breckenridge, *NASA Langley Research Center* (JSR **18**, 5, p. 478) Engineering Note based on AIAA Paper 80-1906

A81-083 Design Approach for Estimating Body Slot Effects on Wing-Body-Tail Lift. William D. Washington, *U. S. Army Missile Command, Redstone Arsenal*; R. E. Wittmeyer and W. H. Appich Jr., *Martin Marietta Corporation* (JSR **18**, 6, p. 481) Synoptic based on AIAA Paper 80-0260

A81-084 Aluminum Oxide Particle Size for Solid Rocket Motor Performance Prediction. R. W. Hermsen, *United Technologies Corporation* (JSR **18**, 6, p. 483) Article based on AIAA Paper 81-0035

A81-085 Past and Present INTELSAT TWTA Life Performance. R. Strauss, *COMSAT Laboratories*; and J. R. Owens, *INTELSAT* (JSR **18**, 6, p. 491) Article based on AIAA Paper 80-0486 CP811

A81-086 Selection of an Optimized Integrated Propulsion System. H. Macklis, R. L. Sackheim and B. Vogt, *TRW Defense and Space Systems Group* (JSR **18**, 6, p. 499) Article based on AIAA Paper 80-1211

A81-087 Charging Results from the Surface Potential Monitor. P. F. Mizera, *The Aerospace Corporation* (JSR **18**, 6, p. 506) Article based on AIAA Paper 80-0334

A81-088 Laboratory Study of the Charging of Spacecraft Materials. M. S. Leung and H. K. A. Kan, *The Aerospace Corporation* (JSR **18**, 6, p. 510) Article

A81-089 Design and Off-Design Performance Calculation of Space Radiators. Masao Furukawa, *National Space Development Agency of Japan* (JSR **18**, 6, p. 515) Article

A81-090 Modification of Spacecraft Potentials by Thermal Electron Emission on ATS-5. Richard Christopher Olsen, *The University of Alabama in Huntsville* (JSR **18**, 6, p. 527) Article

A81-091 Ball-Obturation of a Spinning Tubular Projectile. R. H. Nunn and J. W. Bloomer II, *Naval Postgraduate School* (JSR **18**, 6, p. 533) Article

A81-092 Jet Effects on Near Wake of an Axisymmetric Bluff Body. S. L. Gai, and K. Kapoor, *Indian Institute of Technology* (JSR **18**, 6, p. 540) Article

A81-093 Gust Model Based on the Bivariate Gamma Probability Distribution. O. E. Smith, *NASA Marshall Space Flight Center*; and S. I. Adelfang, *Computer Sciences Corporation* (JSR **18**, 6, p. 545) Article based on AIAA Paper 81-0299

A81-094 Remote Control Canard Missile with a Free-Rolling Tail Brake Torque System. A. B. Blair Jr., *NASA Langley Research Center* (JSR **18**, 6, p. 550) Article based on AIAA Paper 81-0146

A81-095 Structural Sizing Considerations for Large Space Platforms. Walter L. Heard Jr., Harold G. Bush, Joseph E. Walz and John J. Rehder, *NASA Langley Research Center* (JSR **18**, 6, p. 556) Article based on AIAA Paper 80-0680

A81-096 Gas Gun Study of Polyethylene Buffers for Spall Fracture Reduction in Missile Materials. Willis Mock Jr. and William H. Holt, *Naval Surface Weapons Center* (JSR **18**, 6, p. 565) Engineering Note

ENTRY HEATING AND THERMAL PROTECTION—v. 69

HEAT TRANSFER, THERMAL CONTROL, AND HEAT PIPES—v. 70

Edited by Walter B. Olstad, NASA Headquarters

The era of space exploration and utilization that we are witnessing today could not have become reality without a host of evolutionary and even revolutionary advances in many technical areas. Thermophysics is certainly no exception. In fact, the interdisciplinary field of thermophysics plays a significant role in the life cycle of all space missions from launch, through operation in the space environment, to entry into the atmosphere of Earth or one of Earth's planetary neighbors. Thermal control has been and remains a prime design concern for all spacecraft. Although many noteworthy advances in thermal control technology can be cited, such as advanced thermal coatings, louvered space radiators, low-temperature phase-change material packages, heat pipes and thermal diodes, and computational thermal analysis techniques, new and more challenging problems continue to arise. The prospects are for increased, not diminished, demands on the skill and ingenuity of the thermal control engineer and for continued advancement in those fundamental discipline areas upon which he relies. It is hoped that these volumes will be useful references for those working in these fields who may wish to bring themselves up-to-date in the applications to spacecraft and a guide and inspiration to those who, in the future, will be faced with new and, as yet, unknown design challenges.

Volume 69—361 pp., 6×9, illus., $22.00 Mem., $37.50 List
Volume 70—393 pp., 6×9, illus., $22.00 Mem., $37.50 List
